“ We create and maintain viable production processes by consulting drawings, specifications, process manuals to enable production to build high quality products cost effectively with specific emphasis on safety critical processes including torque specifications and weld ”

Executive Summary

Thahameso Civil and Project Management is a construction and project management firm that was formed in June 2012. The company started to operate in July 2012. The word Mphago, which means Provision for Future Supplies, is committed to deliver excellent service to its clients.

Thahameso Civil and Project Management is a multi-disciplinary 100 % Black owned undertaking, Including Highly Disadvantaged Individuals as shareholders to provide professional services in the Civil Engineering, Construction Management and Project Management Environment. The success of Thahameso Civil and Project Management future in civil engineering and construction management will depend increasingly on the capability to adapt to the unique, changing and often challenging development needs of South Africa.

The successful understanding and management of diversity are integral to the operating formula required in these areas.

The members of Thahameso Civil and Project Management have all been well exposed to such unique conditions, challenges and various aspects of managing differing cultures and the necessary people required.

Ntsikae Maseko

Director
Thahameso Civil and Project Management

Mission

To provide a professional service to clients by delivering projects within budget, time and quality specifications, whilst contributing towards the socio-economic advancement of previously disadvantaged individuals and communities.

Thahameso Civil and Project Management endeavours to:

- Create as many job opportunities on projects, with particular focus on rural development strategies;
- Ensure that there is a transfer of skills in all areas of construction;
- Assist emerging enterprises to become sustainable in the construction industry;
- Conduct business in a manner which is responsible to the environment and society as a whole;
- Be courteous and considerate to clients at all times;
- Utilise the best possible methods or technologies in the execution of every project in order to improve results; and to
- Encourage innovative thinking and new ideas to keep ahead with this changing environment.
